

Patent claims

1. Polymerisable dental composition, containing

- 5 (a) 10 to 98.999 wt.-% of at least one bi- or higher-functional ethylenically unsaturated monomer,
(b) 0 to 88.999 wt.-% of at least one monofunctional ethylenically unsaturated monomer,
(c) 0 to 5 wt.-% of an accelerator,
10 (d) 0.001 to 5 wt.-% of a redox initiator system which can trigger the radical polymerisation, and
(e) 0 to 88.999 wt.-% fillers, thixotropic auxiliaries, retarders and other auxiliaries,
(f) 1 to 30 wt.-% of a customary plasticizer

15 characterized in that the redox initiator system comprises (i) a barbituric acid derivative and/or a malonyl sulfamide and (ii) an organic peroxide, selected from the group of the mono- or multifunctional carboxylic acid peroxyesters, and the constituents (a) to (f) are present in two pastes spatially separated from each other.
20

2. Polymerisable dental composition according to claim 1,
characterized in that one of the two pastes separated spatially from each other includes (i) a barbituric acid derivative and/or a malonyl sulfamide and (ii) an organic peroxide, selected from the group of the mono- or multifunctional
25 carboxylic acid peroxyesters.

3. Polymerisable dental composition according to one of claims 1 or 2,
characterized in that the organic peroxide is a carboxylic acid tertiarybutyl-
peroxyester.

- 30 4. Polymerisable dental composition according to one of claims 1 to 3,
characterized in that the organic peroxide is a carbonic-tertiarybutyl-peroxy-(2-ethylhexyl)ester or a 3,5,5-trimethylhexanoic acid-tertiarybutyl-peroxyester.

5. Polymerisable dental composition according to one of the previous claims, characterized in that constituent (a) is contained in a concentration of 30 to 80 wt.-%, preferably in a concentration of 45 to 70 wt.-%.
- 5 6. Polymerisable dental composition according to one of the previous claims, characterized in that constituent (b) is contained in a concentration of 0 to 58.99 wt.-%, in particular in a concentration of 0 to 33.9 wt.-%.
- 10 7. Polymerisable dental composition according to one of the previous claims, characterized in that constituent (c) is contained in a concentration of 0 to 3 wt.-%, in particular in a concentration of 0.05 to 2 wt.-%.
- 15 8. Polymerisable dental composition according to one of the previous claims, characterized in that constituent (d) is contained in a concentration of 0.01 to 3 wt.-%, preferably in a concentration of 0.05 to 2 wt.-%.
- 20 9. Polymerisable dental composition according to one of the previous claims, characterized in that constituent (e) is contained in a concentration of 10 to 68.99 wt.-%, preferably in a concentration of 20 to 53.9 wt.-%.
10. Polymerisable dental composition according to one of the previous claims, characterized in that constituent (f) is contained in a concentration of 1 to 20 wt.-%, preferably in a concentration of 1 to 15 wt.-%.
- 25 11. Use of the polymerisable dental composition according to claims 1 to 10 as filling material, stump build-up material, fixing cement, temporary crown and bridge material, dental material or for the preparation of inlays, onlays, facing shells, modelling materials.
